PROFESSIONAL SUMMARY

Results-driven Mechanical Engineering graduate with a proven track record of leading large-scale operations, managing cross-functional teams, and optimizing project delivery. Demonstrated success orchestrating a **400+ member volunteer organization**, executing a **200+ delegate international conference under budget**, and managing concurrent **product development lifecycles**. Combines strong analytical problem-solving skills with hands-on expertise in resource allocation, risk mitigation, and stakeholder management. Seeking Operations and Manufacturing roles to drive strategic initiatives, ensure cross-functional alignment, and deliver measurable operational improvements.

CORE COMPETENCIES

- **Operations & Project Management:** Cross-Functional Leadership, Resource Allocation, Budgeting, Risk Mitigation, Event Logistics, Agile Methodologies, Stakeholder Collaboration.
- **Process & Quality Systems:** Process Optimization, LEAN Principles, RCA, CAPA, V&V, BOM Management, PLM.
- **Technical Tools:** MS Office Suite, CAD/CAE (SolidWorks, ANSYS) for Design Review, Production Documentation.
- **Certifications:** Google AI Professional, Google PM Professional(Ongoing), IBM Introduction to Project Management, Lean Six Sigma Foundations, Supply Chain Foundations.

LEADERSHIP & OPERATIONS EXPERIENCE

Vice Chairman | *SAE MACE (Society of Automotive Engineers)* **2025 – Present**

- Directed strategic planning and resource allocation across **6+ concurrent engineering project teams**, establishing inter-team coordination frameworks, milestone review cadences, and operational protocols.
- Acted as primary institutional liaison between student teams, faculty advisors, and national SAE boards, driving **cross-functional alignment** between technical and administrative workflows.

Director of Operations | *MACE MUN XII (Model United Nations)* **2024 – 2025**

- Planned and executed end-to-end operations for a **200+ delegate international conference**; developed SOPs and real-time coordination systems across multiple departments.
- Managed **50+ volunteers** from recruitment through event close-out, optimizing venue logistics and delivering the conference **15% under budget** with zero operational escalations.
- Navigated high levels of ambiguity during a pre-event supplier strike by rapidly sourcing materials across new vendors, establishing an emergency procurement framework adopted as an **organizational best practice**.

Secretary | *NSS Unit 117 (National Service Scheme, MACE)* **2024 – 2025**

- Mobilized and directed a **400-member volunteer body** across concurrent community service campaigns, managing role assignments, training briefings, and performance tracking.
- Coordinated with government bodies to execute large-scale, multi-agency residential programs, managing complex logistics, schedules, and personnel deployments for over **250 participants**.

PROJECT MANAGEMENT EXPERIENCE

Project Lead (Chassis Team Lead) | *SAE Baja Collegiate Design Series* **2024 – 2026**

- Led a cross-functional engineering team through the product lifecycle, directing RCA into CAPA-based revisions to resolve constraints and deliver a **17% weight reduction** while ensuring safety compliance.
- Managed supplier negotiations, material procurement, and fabrication timelines, bridging the gap between digital design intent and **shop-floor execution** under strict competition deadlines.

Operations Manager (Team Manager) | *Mega ATV Championship* **2023 – 2024**

- Managed end-to-end execution for a **15+ member team**, maintaining strict control over project budgets and implementing corrective actions that **significantly improved first-pass assembly yield**.

INTERNSHIP EXPERIENCE

Engineering Intern | *Hindustan Aeronautics Limited (HAL) Aero Engine R&D Centre* **July 2025**

- Analyzed structured R&D project management workflows and **tolerance-critical assembly sequences**, gaining exposure to aerospace-grade QMS, compliance tracking, and regulated manufacturing processes.

Manufacturing Intern | *Hindustan Machine Tools Ltd (HMT)* **September 2023**

- Monitored industrial production workflows and **CNC machining operations**, studying the translation of dimensional design requirements into manufactured components under **DFM constraints**.

EDUCATION

B.Tech in Mechanical Engineering **Kothamangalam, Kerala**
Mar Athanasius College of Engineering(MACE)

Honours & Achievements: Best Outgoing Student | Departmental Seminar Topper
